EDUCATION

KIT - Kalaigarkarunanidhi Institute of Technology, Coimbatore - Tamilnadu, India 2024 – 2028

B. Tech Artificial Intelligence & Data Science, Third Year Current **CGPA: 8.32/10.0**

Coursework: DSA, Data Science, Full Stack Development, AWS, Computer Networks, Operating Systems, Database Management Systems, OOPS

EXPERIENCE

AWS Intern, Finest Coder Coimbatore, India (offline) May 2026 - June 2026

- Assisted in deploying and managing AWS cloud infrastructure (EC2, S3, IAM) to support secure and scalable applications.
- Monitored system performance and analyzed resource usage to help improve efficiency.
- Gained hands-on experience in cloud computing and basic DevOps practices while supporting operations.

FREELANCING

- Tracen** — Freelance Developer: Developed a training management system with Admin → Trainer → Mentor → Student workflow and automated Google Meet session generation.

PROJECTS

AI-Based Intrusion Detection System | XGBoost, Scapy, MERN, API Calls Mar 2026

- Built an AI-based system to detect and prevent cyber threats (DDoS, MITM) in real time, improving network security.
- Developed ML models using XGBoost and leveraged Scapy for automated network traffic analysis and threat detection.
- Designed an explainable security framework with clear risk insights and automated response mechanisms.

Udhayam'26 Cultural Event Web Platform | Next.js, MERN, Payment Integration, API Calls Feb 2026

- Built a web platform for a college cultural event, delivering an engaging and responsive user experience.
- Managed registration and payment processing for 7000+ participants with secure and scalable workflows.
- Scan based Attendance System with Optimized performance to handle high traffic and ensure seamless event operations.

Up Skill | MERN Stack, Gemini API Aug 2025

- Built a responsive Resume Analyzer for evaluation and feedback, enhancing career readiness.
- Integrated Gemini API with MERN backend for smooth data processing and AI-powered insights.
- Focused on clean UI/UX design to deliver an intuitive and user-friendly experience.

Genesis ERP | MERN Stack, PostgreSQL, REST APIs Aug 2026

- Built a comprehensive school ERP system to manage admissions, attendance, exams, fees, and communication in one platform.
- Developed modular services using MERN stack with PostgreSQL for secure, scalable data handling.
- Integrated REST APIs and dashboards to deliver smooth user experience and transparent administration.

TECHNICAL SKILLS

C / C++	SQL	Flask
Python	Django	Git
JAVA	Mongo DB	Github
HTML	Express.js	Postman
CSS	React	AWS
JavaScript	Node.js	

CERTIFICATIONS & COURSES

CSC - Advanced Diploma in Computer Application	2024
NVIDIA - Fundamentals of Deep Learning	2026
NPTEL - Programming in JAVA	2026
COURSERA - Artificial Intelligence Essentials	2025
COURSERA - Programming in Python	2025
COURSERA - Web Development	2025

COMPETATIVE PROGRAMMING

Leetcode: Max rating - 1741 | **Solved problems:** 600+ | Top 16.79% globally

Codechef: Max rating - 1483 | **Position:** 2 Star | **Solved Problems :** 900+

Global Rank: Solved 1600+ problems in DSA
